- 1 AN ACT *to renumber and amend* 79.04 (4m); *to amend* 20.835 (1) (d); and *to*
2 *create* 79.04 (4m) (b) of the statutes; *relating to: utility aid payments based*
3 *on a production plant's value in 1990.* *the budget adjustment bill*

Analysis by the Legislative Reference Bureau

Under current law, generally, each county and municipality in which a power production plant is located receives a utility aid payment from the state. If the plant began operation before January 1, 2004, the payment is based on the plant's net book value. Under current law, ending with payments in 2008, the power production plant value used to determine the utility aid payment to a county or municipality may not be less than power production plant value used to determine the payment in 1990. If, however, the plant began operation after December 31, 2003, the utility aid payment is based on the plant's power capacity. Under current law, beginning with the payments in 2009, if in any year the amount of the utility aid payment to a county or municipality would be greater based on the plant's power capacity instead of the plant's value, the county or municipality will receive, in that year and in each year thereafter, a payment based on the plant's capacity.

Under the bill, for municipalities where production plants are located, if the combination of amounts determined for production plants based on value or power capacity and the amounts determined for substations and general structures based on value are less for a municipality than the payment amount based on the value of the property used to calculate the municipality's payment in 1990, less the value of property no longer in use, the municipality will receive a payment based on the value

and PRE-414
of the property used to calculate the municipality's payment in 1990, less the value of property no longer in use.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
